STACK

AI & LLMs

LangChain · LangGraph · Google ADK · RAG · MCP · Langfuse · RAGAs

Dev

Python · FastAPI · C# · ORM · TDD · AI

DevOps

Docker · CI/CD · GCP · Azure · ArgoCD

Methods

Scrum · SAFe · Clean · DDD · BDD

LANGUAGES

French *Native*

English *Fluent (professional working proficiency)*

LEAD AI ENGINEER

Senior AI engineer combining 25 years of software experience with 2 years building production generative systems (RAG, agents, LLM evaluation). Proven talent who also founded and ran his own software company for 10 years.

SKILLS

AI & DATA

AI Engineering: Prompting, LLMs, frameworks (LangChain, ADK).

RAG: Ingestion & inference pipelines, vector DBs, knowledge graphs.

Agentic systems: Output parsers, function calling, tools, skills, MCP, multi-agent workflows.

Evaluation: LLM-as-a-judge & datasets (Langfuse, RAGAs).

SOFTWARE ENGINEERING

Design & Development: AI, backend, databases, frontend — AI-assisted (Claude Code, Cursor).

Testing: Unit, integration, e2e, TDD, BDD.

Software architecture: N-tier, clean architecture, domain-driven design.

CI/CD pipelines: GitLab, GitHub, Azure DevOps.

Containerization: Docker.

Deployment: GCP, Azure.

SOFT SKILLS & METHODOLOGIES

Work context: Teamwork & autonomy, technical leadership.

Agile methodologies: Scrum, SAFe, Kanban, XP.

EDUCATION

DUT Informatique — 2-year technical degree in Computer Science
— 1999 – 2000 (IUT Dijon)

DEUG A (Sciences MIAS) — 2-year university degree in Mathematics & Computer Science
— 1996 – 1998 (University of Dijon)

EXPERIENCE

STUDI

Mar. 2024 – Mar. 2026

Lead AI Engineer — APIs, AI Chatbots & Callbot with RAG & agents

- Designed and built end-to-end the chatbots and callbot of France's leading e-learning provider — production systems serving learners daily (Python APIs, LLMs, RAG, agents, evals).
- Built full RAG ingestion & inference pipelines: chunking, embeddings, hybrid search, reranking, HyDE.
- Designed agents and workflows: patterns, graphs, tools, MCP, prompts (LangGraph & Google ADK).
- Implemented LLM-as-a-judge evaluation of LLM chains, RAG and agents (Langfuse, RAGAs).

Stack: APIs, RAG, agents, Python, Cursor, Claude Code, LangChain, LangGraph, Langfuse, RAGAs, SQLAlchemy, Alembic, PostgreSQL, MCP, Google ADK, GitLab, Azure DevOps, SQL, Qdrant, Pinecone, Redis cache.

Jul. 2020 – Feb. 2024

Lead Fullstack Developer — E-learning platform (front & back end)

- Technical direction of the e-learning platform:DDD, Clean & Hexagonal architecture, CQRS, event sourcing.
- Back-end (.NET Core) and front-end (Angular) development.
- Coordinated offshore teams (Russia, Hungary); business analysis and Agile backlog management in Jira (epics, user stories, tasks).
- Unit testing (xUnit) and functional testing (Gherkin, SpecFlow); deployment with Git, Octopus and Azure.

Stack: C#, .NET Core, EF,DDD, BDD, CQRS, MediatR, Polly, xUnit, SQL Server, Angular, TypeScript, HTML, CSS, Git, Jira, Octopus, Scrum, Gherkin, SpecFlow, Moq.

KALISYS

Jul. 2004 – Jul. 2020

Founder & Managing Director — company management and client relations

- Founded and ran the software company for 16 years: sales, quoting, project tracking, invoicing.
- Hiring and team management; client relations, project delivery, training and support.

Jan. 2019 – Jul. 2020

Portfolio management and trading-strategy optimization application

- Designed (UML) and developed a solution for managing and optimizing portfolios and trading strategies.
- POCs, development, testing and deployment.

Stack: VS 2019, C#, SQL Server, UML, Angular, Git.

May 2014 – Nov. 2018

Automated trading-strategy creation platform (NLP → MQL)

- Designed and built a natural-language modeling framework and a service translating trading strategies from natural language into MQL4/5 (automated trading robots).
- Machine learning & pattern recognition (TensorFlow).

Stack: VS 2015, C#, MQL 4&5, TensorFlow, ML & pattern recognition.

SCHNEIDER ELECTRIC

Jan. 2011 – Jun. 2013

Tech Lead & Scrum Master — electrical substation modeling application

- Developer, then tech lead and Scrum Master of the local team, in an agile, continuous-integration environment.
- Steered the offshore team in India and mentored the team's junior members.
- Built storage, services and UIs; application-wide optimization via the repository pattern.

Stack: Scrum, C#, WPF, EF, Redmine, Tortoise SVN, BDD, NUnit, Moq, SQL Server.

KALISYS

Jul. 2004 – Dec. 2010

Multiple client projects & in-house products — .NET design & development

- Consulting engagements: ASF (distributed cache, Velocity/AppFabric), BALEA (industrial weighing), SYNOX (M2M extranet), VAL Solutions (preventive-medicine web app).
- In-house products: ERP systems for holiday and event management, rich web client portal (document management), online booking platform.

Stack: *C#, ASP.NET, .NET 1.1–3.5, WinForms, WCF, WPF, Silverlight, Entity Framework, SSIS, SQL Server, NUnit, UML.*

| AXILOG (FRANCE TÉLÉCOM)

May 2001 – Aug. 2002

ERP development for medical practices (C++ Builder, Delphi, Interbase)

DETAILED PROFESSIONAL EXPERIENCE

STUDI

Lead AI Engineer — APIs, AI Chatbots & Callbot with RAG & agents

Mar. 2024 – Mar. 2026

SUMMARY	End-to-end design and development of the AI chatbots and callbot of France's leading e-learning provider — production systems serving learners daily (Python APIs, LLMs, RAG, agents, evaluation).
ROLE	Lead AI Engineer
ACHIEVEMENTS	• Built the chatbots and callbot end to end (Python APIs, LLMs, RAG, agents, evals) • RAG preparation and querying: ingestion & inference pipelines, chunking, embeddings, hybrid search, reranking, HyDE • Designed agents and workflows: patterns, graphs, tools, MCP, prompts (LangGraph & Google ADK) • LLM-as-a-judge evaluation of LLM chains, RAG and agents (Langfuse, RAGAs) • AI-assisted development (Claude Code, Cursor)
ENVIRONMENT	Python, FastAPI, LangChain, LangGraph, Google ADK, Langfuse, RAGAs, MCP, Qdrant, Pinecone, Redis, SQLAlchemy, Alembic, PostgreSQL, SQL, GitLab, Azure DevOps, Cursor, Claude Code

STUDI

Lead Fullstack Developer — E-learning platform (front & back end)

Jul. 2020 – Feb. 2024

SUMMARY	Architecture and development of the website of France's leading e-learning platform.
ROLE	Architect, developer (tech lead)
ACHIEVEMENTS	• Architecture: DDD, Clean & Hexagonal Architecture, SOLID, n-tier, CQRS, event sourcing • Back-end (.NET Core) and front-end (Angular) development • Coordination of offshore teams (Russia, Hungary) • Specification: business analysis, Agile backlog breakdown in Jira (epics, user stories, tasks) • Testing: unit (xUnit) and functional (Gherkin, SpecFlow) • Deployment: Git, Octopus, Azure
ENVIRONMENT	Visual Studio 2019/2022, C#, .NET Core, EF Core, MediatR, Polly, SQL Server, Angular, TypeScript, HTML, CSS, Scrum, Git, Jira, Octopus, Moq

KALISYS

Founder & Managing Director — company management and client relations

Jul. 2004 – Jul. 2020

SUMMARY	Founded and ran the KALISYS software company: proprietary product development, consulting engagements at client sites, management and client relations.
ROLE	Managing director, project manager, designer/developer
ACHIEVEMENTS	• Company management: sales, quoting, project tracking, invoicing • Hiring and team management • Client relations, project delivery, training and support

KALISYS

Portfolio management and trading-strategy optimization tool

Jan. 2019 – Jul. 2020

SUMMARY	Design and development of a solution for managing and optimizing portfolios and trading strategies.
ROLE	Designer, developer
ACHIEVEMENTS	• Design (UML) • POCs • Development • Testing • Deployment
ENVIRONMENT	<i>Visual Studio 2019, C#, SQL Server, UML, Angular, Git</i>

KALISYS

Trading-strategy automation solution (NLP → MQL)

May 2014 – Nov. 2018

SUMMARY	Built an open framework for modeling natural language (French, English, Spanish) and a service translating trading strategies from natural language into MQL4/5 (creation of automated trading robots).
ROLE	Designer, developer, delivery lead, partner relations
ACHIEVEMENTS	• Technology watch on natural-language understanding • Designed and built a language and framework for modeling and conceptualizing natural language • Designed, built, tested and delivered the service creating automated trading robots from natural language • Machine learning & pattern recognition (TensorFlow) • Managed the product-owner relationship
ENVIRONMENT	<i>Visual Studio 2015, C#, MQL 4 & 5, TensorFlow, ML & pattern recognition</i>

SCHNEIDER ELECTRIC (LATTES)

Electrical substation modeling software

Jan. 2011 – Jun. 2013

SUMMARY	In an agile, continuous-integration context with local and offshore teams: developer, then tech lead of the local team, Scrum Master, and finally project manager for the Indian team.
ROLE	Developer (6 months), Tech lead (1 year), then Scrum Master (1 year)
ACHIEVEMENTS	• Built storage, services and UIs • Application-wide optimization via the repository pattern • Mentored the team's less experienced members • Communication with developers, testers, partners and the product owner • Scrum Master of the local team • Steered the offshore team in India
ENVIRONMENT	<i>Scrum, C#, WPF, EF, SQL Server, Redmine, Tortoise SVN, BDD, NUnit, Moq</i>

KALISYS

Rich web client portal (payments & document management)

Jul. – Dec. 2010

SUMMARY	Design and development of an ASP.NET web client portal with secure access to personal records and documents.
ROLE	Designer, developer, delivery lead
ACHIEVEMENTS	• UML design • Development in an n-tier architecture • Built the DAL, BLL, Facade, Contract and UI layers • Analysis and testing in coordination with the business stakeholders
ENVIRONMENT	.NET Framework 3.5, WebForms (ASP.NET), Visual Studio 2008, C#, MSDE

ASF (AUTOROUTES DU SUD DE LA FRANCE)

Distributed cache layer

Apr. – Jun. 2010

SUMMARY	Development and integration of a distributed-cache business layer with Velocity (AppFabric caching).
ROLE	Developer
ACHIEVEMENTS	• Built POCs • Developed the distributed cache layer • Application integration
ENVIRONMENT	Velocity/AppFabric, UML, SOA, WPF, NUnit, SQL Server, Visual Studio 2008

BALEA

POCs for an embedded industrial weighing solution

Sep. 2009 – Jan. 2010

SUMMARY	Design and delivery of POCs to test the technical feasibility of various aspects of an embedded industrial weighing solution.
ROLE	Developer
ACHIEVEMENTS	• Designed the POCs • Built the POCs • Presented the technical-feasibility results • Integrated selected aspects into the existing solution
ENVIRONMENT	Scrum, C#, Compact Framework .NET 3.5, WCF, WPF, SSIS, EntLibs, Silverlight, Entity Framework, LINQ, Visual Studio 2010

GROUPE SYNOX

Extranet for managing M2M communicating devices

Jun. – Aug. 2009

SUMMARY	Design and development of ASP.NET web interfaces for pairing, activating and tracking the data consumption of GSM communicating devices. Multi-stakeholder extranet (carriers, telecom distributors, sites, device suppliers, customers).
ROLE	Designer/Developer
ACHIEVEMENTS	• Merise design • Development in a 3-tier architecture • Used the Entity Framework ORM and LINQ for the DAL
ENVIRONMENT	.NET Framework 3.5, Entity Framework, LINQ, ASP.NET, Visual Studio 2008, C#, Rational XDE .NET, SQL Server

KALISYS

Complete e-commerce solution — online holiday booking

Sep. 2008 – May 2009

SUMMARY	Design and development of ASP.NET web interfaces for booking holidays with online payment and follow-up management.
ROLE	Designer/Developer, delivery lead
ACHIEVEMENTS	• UML design • Development in an n-tier architecture • Built the DAL, BLL, Facade, Contract and UI layers • Analysis and testing in coordination with the business stakeholders
ENVIRONMENT	.NET Framework 3.5, WebForms (ASP.NET), Visual Studio 2008, C#, Rational XDE .NET, SQL Server

VAL SOLUTIONS – BL INFORMATIQUE

Preventive-medicine web application

Mar. – Jul. 2008

SUMMARY	Development work on a distributed web application for preventive-medicine management for an IT-services client (n-tier, distributed architecture, remoting).
ROLE	Technical consultant, Designer/Developer
ACHIEVEMENTS	• Advised on .NET technology choices • Adapted UML class diagrams • Created Oracle and SQL Server scripts • Built the DAL, BLL and Facade layers • Testing and coordination with the UI team
ENVIRONMENT	.NET Framework 2.0, WebForms (ASP.NET), Visual Studio 2005, C#, Rational XDE .NET, SQL Server, Oracle

KALISYS

ERP systems for holiday and event booking management

Jul. 2004 – 2009

SUMMARY	Design and delivery of several complete integrated-management applications for holiday and event organizers (youth camps, leisure centers, event management) in a 3-tier architecture.
ROLE	Project manager, Designer/Developer, delivery lead
ACHIEVEMENTS	• Wrote quotes, initiated and tracked projects with the client • Wrote the functional specifications • Detailed functional analyses, conceptual data models, technical architecture definition • Development, integration and unit testing • Application maintenance and documentation updates
ENVIRONMENT	.NET Framework 1.1 and 2.0, WinForms, Visual Studio 2003-2005, C#, ASP.NET, MSDE, Access, Win Design

AXILOG (FRANCE TÉLÉCOM)

ERP for medical practices

May 2001 – Aug. 2002

SUMMARY Design and delivery of management modules for medical practices.

ROLE Designer/Developer

ACHIEVEMENTS

- Detailed functional analyses and conceptual data models
- Built business modules
- Integration and unit testing
- Documentation updates

ENVIRONMENT *C++ Builder (Borland), Delphi, Interbase, Power AMC*

FREELANCE

Data-transmission application for medical laboratories

Jul. 2000 – May 2001

SUMMARY Design and delivery of medical capture-and-analysis software with secure messaging for medical-analysis laboratories.

ROLE Designer/Developer

ACHIEVEMENTS

- Functional analyses and conceptual data models
- Built the software
- Documentation updates

ENVIRONMENT *Visual C++, Access*
